The screenshot displays the Spandidos Publications website interface. At the top, there is a horizontal navigation bar with colored buttons for each journal: Oncology Letters (purple), International Journal of Oncology (pink), Molecular and Clinical Oncology (orange), Experimental and Therapeutic Medicine (green), International Journal of Molecular Medicine (teal), Biomedical Reports (blue), Oncology Reports (dark blue), Molecular Medicine Reports (dark purple), World Academy of Sciences Journal (dark teal), International Journal of Functional Nutrition (dark red), International Journal of Epigenetics (purple), and Medicine International (red).

Below the navigation bar is a sidebar menu with the following items: Home, Online Submission, Information for Authors, Language Editing, Information for Reviewers, Information for Librarians, Information for Advertisers, Conferences, About Spandidos, Information, Contact Us, Aims and Scope, Abstracting and Indexing, Editorial Policies, Job Opportunities, Terms and Conditions.

The main content area is titled "Journals" and features a grid of 12 journal covers, each with a distinct color and logo. The covers include: International Journal of Molecular Medicine (green), International Journal of Oncology (pink), Molecular Medicine Reports (dark blue), Oncology Reports (blue), Experimental and Therapeutic Medicine (green), Oncology Letters (purple), Biomedical Reports (teal), Molecular and Clinical Oncology (orange), World Academy of Sciences Journal (dark teal), International Journal of Functional Nutrition (dark red), International Journal of Epigenetics (purple), and Medicine International (red).

About Spandidos Publications

Spandidos Publications was founded in 1992 and has developed into a leading publishing group in the biomedical sciences field. We currently publish twelve journals: International Journal of Oncology, Oncology Reports, International Journal of Molecular Medicine, Molecular Medicine Reports, Experimental and Therapeutic Medicine, Oncology Letters, Biomedical Reports, Molecular and Clinical Oncology, World Academy of Sciences Journal, International Journal of Functional Nutrition, Medicine International and International Journal of Epigenetics.

All journals published by Spandidos Publications maintain the highest standards of quality and the members of their Editorial Boards are world-renowned scientists. The company has offices based in Athens and London and receives high quality submissions from authors worldwide, including Europe, the Americas Asia, Africa and Australia.

Our main aim is to facilitate scientific communication in a clear, concise and objective manner, while striving to provide prompt publication of original works of high quality.

The group has held more than 50 conferences in the fields of oncology and molecular medicine. Our conferences are organised on an annual basis with the aim of encouraging scientific communication and clarity, and to aid the development of international collaboration between established and expanding research groups around the world.

Spandidos Publications is a member of several industry organizations, including the Association of Learned and Professional Society Publishers (ALPSP) and the Publishers International Linking Association (CrossRef). We are in the process of becoming a member of the Counting Online Usage of Networked Electronic Resources (COUNTER) and the UK Serial Group.

Spandidos Publications is also a participating member in the LOCKSS (Lots of Copies Keep Stuff Safe) initiative. LOCKSS will enable any library to maintain their own archive of content from Spandidos Publications and other publishers, with minimal technical effort.

Reasons to publish with Spandidos Publications

- High quality in-house copyediting to ensure high standards of communication
- Constructive, efficient and rapid peer review
- Rapid publication
- Included in all major bibliographic databases
- High visibility with 4,575,033 page views in 2019 and international readership in relevant fields of research (230 countries)
- Spandidos Publications makes articles freely available 12 month after the publication
- Immediate open access is also available subject to an article-processing charge

International Journal of Oncology

Print ISSN: 1019-6439

Online ISSN: 1791-2423

Published monthly

Web of Science Impact Factor: 5.884

Scopus CiteScore: 11.1

Date Established: 1992

Aims and scope

The International Journal of Oncology provides an international forum for the publication of the latest, cutting-edge research in the broad area of oncology and cancer treatment. The journal accepts original high quality works and reviews on all aspects of oncology research including carcinogenesis, metastasis, epidemiology, chemotherapy and viral oncology.

Through fair and efficient peer review, the journal is dedicated to publishing top tier research in the field, offering authors rapid publication and high standards of copy-editing and production.

The International Journal of Oncology is published on a monthly basis in both print and early online.

Oncology Reports

Print ISSN: 1021-335X

Online ISSN: 1791-2431

Published monthly

Web of Science Impact Factor: 4.136

Scopus CiteScore: 7.6

Date Established: 1994

Aims and scope

Oncology Reports is a monthly, peer-reviewed journal devoted to the publication of high quality original studies and reviews concerning a broad and comprehensive view of fundamental and applied research in oncology, focusing on carcinogenesis, metastasis and epidemiology.

The journal is published in both print and electronic format.

Spandidos Publications

Print ISSN: 1107-3756

Online ISSN: 1791-244X

Published monthly

Web of Science Impact Factor: 5.314

Scopus CiteScore: 8.5

Date Established: 1998

Aims and scope

The International Journal of Molecular Medicine is a monthly, peer-reviewed journal devoted to the publication of high quality studies of molecular mechanisms of human disease. The journal welcomes research on all aspects of molecular and clinical research, ranging from biochemistry to immunology, pathology, genetics, human genomics, microbiology, molecular pathogenesis, molecular cardiology, molecular surgery and molecular psychology.

The International Journal of Molecular Medicine aims to provide an insight for developing molecular tools and identifying molecular targets for the diagnosis and treatment of a diverse number of human diseases to researchers within the community.

Online ISSN: 1791-3004

Published monthly

Web of Science Impact Factor: 3.423

Scopus CiteScore: 5.9

Date Established: 2008

Aims and scope

Molecular Medicine Reports is a monthly, peer-reviewed journal that includes studies devoted to molecular medicine, underscoring aspects including pharmacology, neurosciences, molecular cardiology and molecular surgery.

In vitro and *in vivo* studies on experimental model systems pertaining to mechanisms of a diversity of diseases offer researchers the tools and knowledge with which to aid in the diagnosis and treatment of human diseases.

Experimental and Therapeutic Medicine

Print ISSN: 1792-0981

Online ISSN: 1792-1015

Published monthly

Web of Science Impact Factor: 2.751

Date Established: 2010

Aims and scope

Experimental and Therapeutic Medicine aims to provide an expedient publication in both print and electronic format, of studies relating to biology, gene therapy, infectious disease, microbiology, molecular cardiology and molecular surgery. The journal welcomes studies pertaining to all aspects of molecular medicine, and studies relating to *in vitro* or *in vivo* experimental model systems relevant to the mechanisms of the disease are also included.

All materials submitted to this journal undergo the appropriate review via referees who are experts in this field. All materials submitted follow international guidelines with regard to approval of experiments on humans and animals.

Oncology Letters

Print ISSN: 1792-1074

Online ISSN: 1792-1082

Published monthly

Web of Science Impact Factor: 3.111

Scopus CiteScore: 5.8

Date Established: 2010

Aims and scope

Oncology Letters is a monthly, peer-reviewed journal, available in print and online, that focuses on all aspects of clinical oncology, as well as *in vitro* and *in vivo* experimental model systems relevant to the mechanisms of the disease.

The principal aim of Oncology Letters is to provide the prompt publication of original studies of high quality that pertain to clinical oncology, chemotherapy, oncogenes, carcinogenesis, metastasis, epidemiology and viral oncology in the form of original research, reviews and case reports.

International Journal of Functional Nutrition

Print ISSN: 2634-7989

Online ISSN: 2634-7237

Published bi-monthly

Date Established: 2020

Aims and scope

International Journal of Functional Nutrition is a Journal providing rapid publication with special emphasis on Functional Nutrition by an approach that focuses on identifying solutions to significantly improve human and animal health outcomes both by *in vitro* and *in vivo* studies. This emerging nutrition model combines the very best of modern biochemistry, pharmacology, immunology, biology and genetics, and critical thinking and is being driven by increasing consumer demand. All manuscripts submitted to International Journal of Functional Nutrition are subject to review.

The International Journal of Functional Nutrition is an Open Access journal, that publishes original research in the area of Functional Nutrition.

Through fair and efficient peer review, the journal is dedicated to publishing top tier research in the field, as well as high standards of copy-editing and production.

International Journal of Epigenetics

Print ISSN: 2752-5406

Online ISSN: 2752-5414

Published bi-monthly

Date Established: 2021

Aims and scope

The International Journal of Epigenetics is an open access journal that provides rapid publication of articles in all areas relevant to the subject of epigenetics. The journal serves the novel aim of worldwide unrestricted access to research publications. The International Journal of Epigenetics is an open access journal and supports the Open Access Initiative (OAI) in academic publishing. We believe that subscription-based journals constrain the flow of scientific knowledge by limiting the visibility and impact of published works. Indexing and retrieval of all scientific papers is top priority. All articles published in The International Journal of Epigenetics are subject to peer review.

The International Journal of Epigenetics welcomes the submission of scientific manuscripts in the broad field of epigenetics. It aims to cover several areas relating to modern genetics, medical genetics, genomics, metagenomics, biochemistry, molecular biology, bioinformatics, molecular modelling, drug design, virology, stem cells and cell signalling.

Through fair and efficient peer review, the journal is dedicated to publishing top tier research in the field, as well as high standards of copy-editing and production.
